

**NRD-515 Rx BOARD BASIC FILTERS, standard Rx from PE1ABR**

**BLUE = NTK - CLF-D6S | -6 dB = 5.116 kHz | -60 dB = 8.175 kHz | shape 60/6 = 1.598 | loss = 2.7 dB**

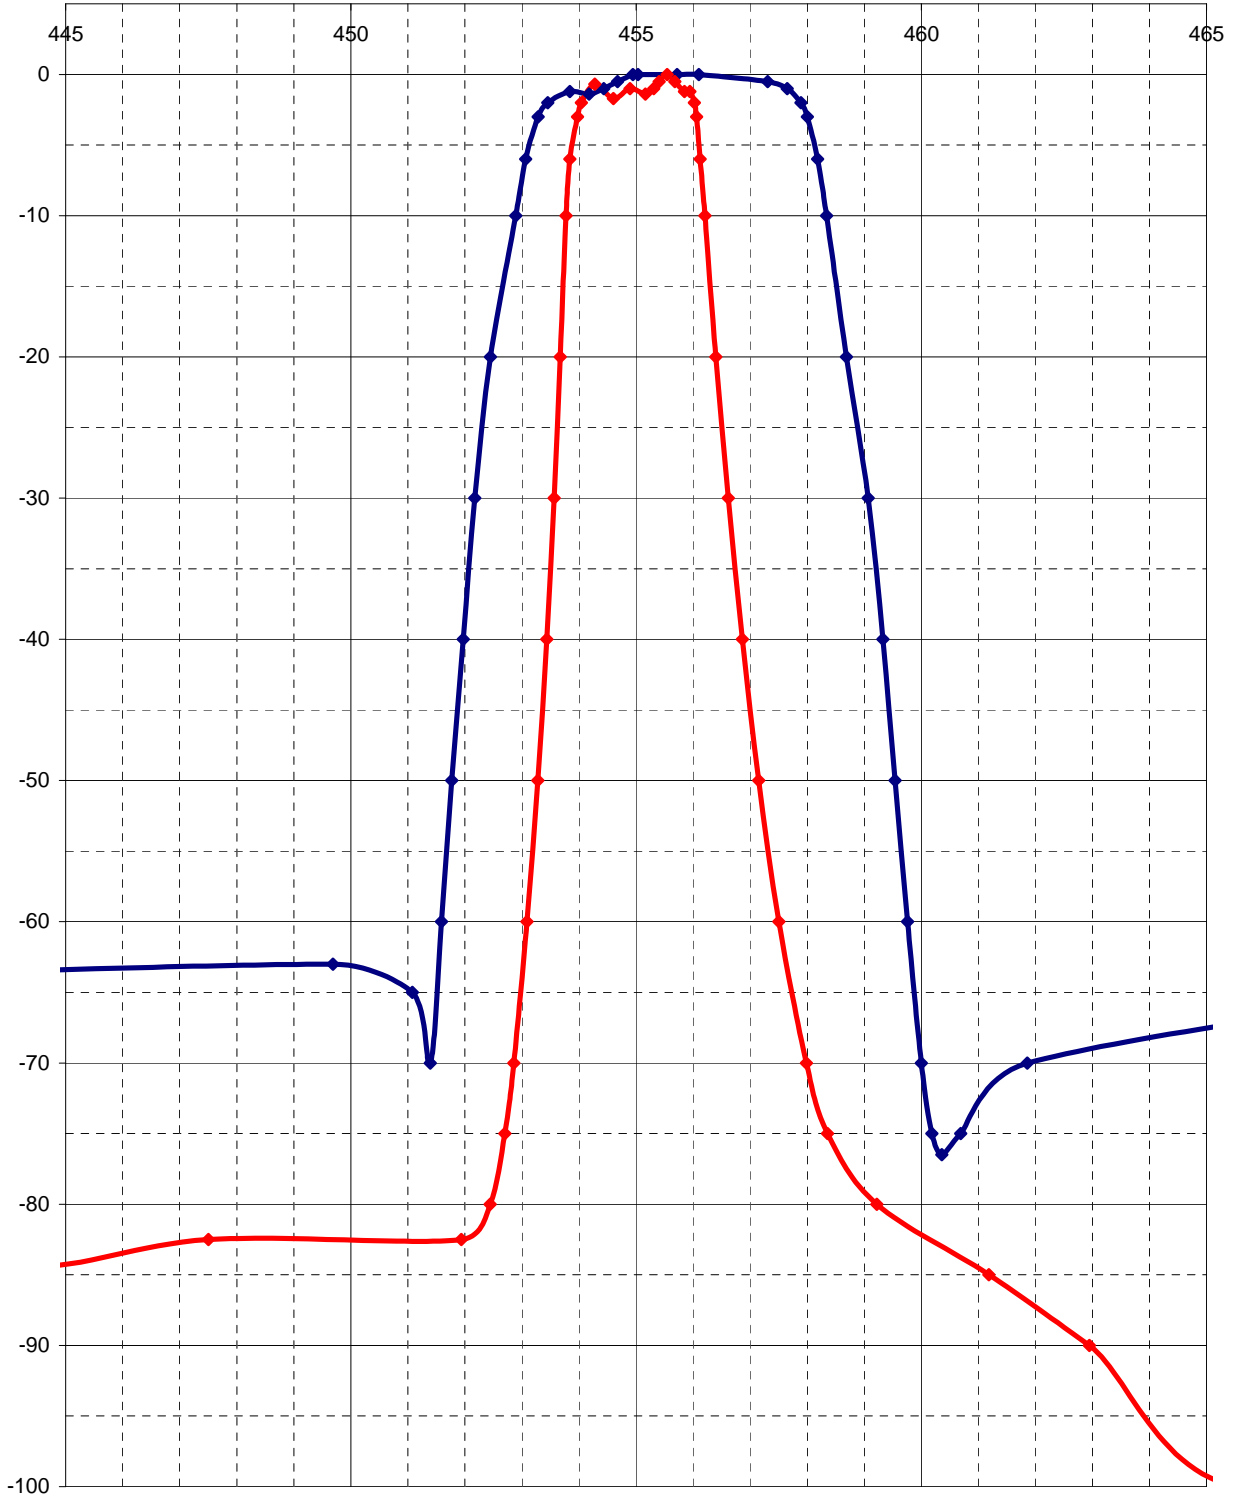

**The narrow AM filter gives the rather bassy sound**

**RED = -6 dB = 2.287 kHz | -60 dB = 4.413 kHz | shape 60/6 = 1.930 | loss = 4.2 dB**

**KOKUSAI - MF-455-10AZ121 - combined with 2 transformers ( 2:1 and 1:1 !! )**

**Both in-circuit measurement with filter switch diodes temporary removed.**

**in-circuit Z = 1K Ohm, Kokusai with internal sticky foam replaced**

**NRD-515 Rx BOARD BASIC FILTERS, standard Rx from PE1ABR**
