

D11- 1N4002 is NOT the ideal choice for this task
It is replaced by a RGP10M diode

D1 - 1N4148 IS UNSAFE: replaced by a BYD33G, RGP10M is also OK

If you ever replace the VR pots: use 1K types
they are much easier alignable
I drilled an extra hole in the middle and used 1K multiturn pots.

All NPN = 2N4401 or equivalent (BC639)
