

**Mycro-Tek Front-End  
Solutions Introduce...**

**Freedom  
From  
Choice**

**Mycro-Tek**

When the problem is too many choices, just make *one*... **Mycro-Tek**. Our approach to front-end system design frees you from the choices you used to have to make:

**PC vs. MAC**

This is no longer an issue when you can have the best of *both*—superior graphics on the Mac and PC compatibility. Mycro-Tek, the PC-Mac Integrators, gives you this freedom in a fully integrated newspaper publishing system... *freedom from choice*.

**SHRINK-WRAP vs.  
NEWSPAPER-SPECIFIC**

Why compromise with general purpose software that doesn't fulfill newspaper needs? With **Mycro-Comp™** production software, you can paginate full pages, sell, compose and update classified and display ads; input graphics from scanners and CD-ROM units; create automatic page dummies; utilize full-featured editorial functions; create graphics and drive PostScript™ compatible devices.

**MYCRO-TEK SERVICE AND  
SUPPORT vs. ...**

Sorry. We can't think of an alternative. For 16 years we've provided unequalled

customer support to newspapers. With our superior training, on-site installation, service, software updates and guaranteed integration, you spend your time meeting deadlines and not meeting technicians.

Call **Mycro-Tek**. The only choice you'll have to make is just how much of the future you want to see right now.

**MYCRO-TEK**

*The Front-End of the Future Starts Here.*
